Github: <https://github.com/money1team>

A passionate software engineer and UI/UX designer who thrives on crafting seamless digital experiences. My expertise spans frontend technologies like JavaScript, TypeScript, Angular, and React and backend solutions including PHP, MySQL, MongoDB, and Node.js. With a degree in Business Information Technology and certifications in Android development, UI/UX design, and data analytics, I am driven by a relentless pursuit of innovation and excellence in every project I undertake.

---

## Professional Experience

### Frontend Developer

Innovate Global, Kenya

July 2024 - Present

- Designed and developed responsive web applications using HTML, Angular and TypeScript to improve user experience and increase user engagement.
- Collaborated with backend developers and designers to create visually appealing and functional interfaces for various digital platforms.
- Conducted regular testing and debugging to identify and resolve issues, ensuring consistent performance and cross-browser compatibility.

### Full Stack Developer

Freelance, Nairobi County, Kenya

January 2024 - June 2024

- Delivered end-to-end web solutions, seamlessly integrating frontend mainly Angular and React and backend technologies to create robust and scalable applications tailored to client needs.
- Developed RESTful APIs using Node.js and Express for seamless communication between front-end and back-end systems
- Integrated MySQL and MongoDB databases to store and retrieve data efficiently for various projects

### Intern

Marathon, Kenya

June 2023 - August 2023

- Played a pivotal role in tailoring services to meet diverse customer needs, ensuring every interaction was personalized and impactful.
- Gathered crucial data to inform the development and design of services and applications, consistently exceeding customer expectations.
- Collaborated with cross-functional teams on various projects to ensure timely completion and success

---
